Änderungen vorbehalten

\*Under the main booth of Knorr-Bremse the Group brands Merak, Evac, Selectron, Kiepe Electric, IFE and Microelettrica are united

### Hall 1.2, Booth 250

 **KNORR-BREMSE**

Knorr-Bremse's highly innovative system solutions are making rail transportation more reliable, more connected, safer and cleaner for both people and freight, as well as more convenient and efficient. The success is sustained by the global megatrends and we help our international customers such as vehicle manufacturers and rail operators find optimal responses to these huge challenges. Knorr-Bremse's solutions are boosting the capacity, availability and safety of local and long-distance passenger and freight services. And the eco-friendly technologies are helping rail contribute to a more climate-friendly transportation system, with a holistic approach to life-cycle management that covers the entire operating life of rail vehicles and more.

 **KNORR-BREMSE**

**Hall 5.2, Booth 700****MICROELETTRICA**

Microelettrica is regarded as a well-established specialist in electronic and electromechanical control system components – and a leading supplier of DC switching and circuit breaker products. The company will be showcasing its full set of components for DC switchgear at the COMETFANS booth. It's the most complete kit of its kind on the market, capable of meeting any and all requirements related to DC traction systems. As for COMETFANS – with their energy-saving, low-noise designs, the company's fan units are market-leading products used by rail operators and manufacturers worldwide.

**In front of the South Entrance****MERAK****EVAC**

What if we decided to completely rethink trains? And design them so they were individually configurable? Based on flexible platforms? Knorr-Bremse and the Group's Evac and Merak brands are all partners of DB Ideas Trains.

**Bus Display: Sommergarten****KIEPE ELECTRIC**

Trade visitors to our Bus Display can find out more about city buses built by international manufacturers, as well as systems for bus-charging infrastructure and products by specialized suppliers. Among the exhibitors they will find Knorr-Bremse Group brand Kiepe Electric with their impressive IMC buses, characterized by exceptionally high energy efficiency and charging capacity.

**Hall 9, Booth 455**Rail Vision  
PROGRESSIVE ON TRACK

Together with our partner Rail Vision, Knorr-Bremse is supplying new functions that will exert a major influence on automated train operation – in the field of sensor-driven environment observation and obstacle detection, for example.

**Hall 27, Booth 511**

Europe's Rail

Knorr-Bremse is proud to be a founding member of European technology initiative ERJU. By focusing on digital innovations and automation solutions, the initiative aims to transform rail transportation to meet the objectives of the European Green Deal. We will be showcasing the new Knorr-Bremse Electromagnetic Brake and other products at the EJRU booth.

**Hall 25, Booth 120****ZELISKO**

With innovative solutions for energy, signaling and mobility management systems, Zelisko supplies key components for the energy revolution and tomorrow's mobility.

**Hall 1.2, Booth 560****nexxiot**

Swiss firm Nexxiot is a leading supplier to the TradeTech sector and specializes in upgrading railcars and containers with IoT technology, turning them into connected trade assets. With the connection of Knorr-Bremse's rail brakes, doors, HVAC, sanitary and other systems with Nexxiot's digital ecosystem and generating data-driven insights, customers will benefit from increased vehicle availability, optimized lifecycle costs and greater operational efficiency.
